

CONVECTAIR

The efficient alternative to baseboard heaters

Whether for residential or commercial use, in a new or renovated building, CONVECTAIR heating units are hard to beat. Their sleek low profile, muted colour and high efficiency allow them to blend harmoniously with any decor while providing maximum comfort. Convector is the wise choice: safe economical units that provide state-of-the-art heating technology.

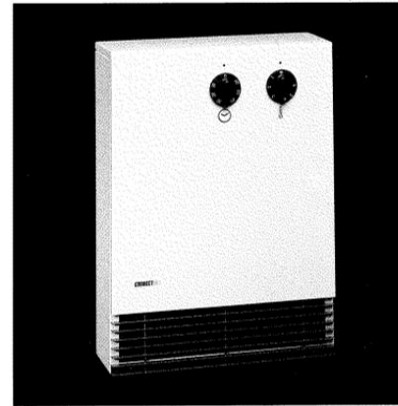

Model 7821-C

CONVECTAIR bathroom Superheater

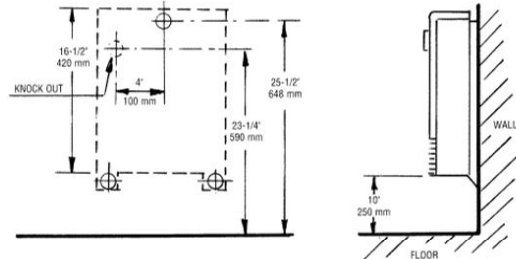

**COMFORT
AND
WARMTH
AT YOUR
FINGERTIPS**

No more shivers; that's what the Superheater offers you. The safe, convenient design of this bathroom blower protects it against splashing water, while the noiseless fan provides quick, reliable heating. Basic heating (1000 watts) is controlled by a thermostat and super-heating (2000 watts) by a timer. Available in 3 colours: beige, off-white or pure white.

model 7821-C

- Splash-proof double-wall construction for a safe installation in bathroom environments.
- Hydraulic thermostat for base-heat control (1000W, fan-forced).
- Mechanical timer can be set from 0 to 60 minutes for accelerated heating control (2000W, fan forced). The timer can be stopped manually.
- Ultra-quiet squirrel-cage turbine for fast and silent operation.
- High-quality epoxy finish available in a choice of three colours: white (white grille), off-white (charcoal-brown grille) or beige (charcoal-brown grille).
- Fast-heating ni-chrome heating element with built-in automatic reset temperature limiting switch, designed to shut off the fan and heating element in case of an obstructed air path.
- Front louvered air outlet designed to achieve ideal air distribution in the room.
- Minimum installation height is 10" from floor to bottom of unit.

Superheater 7821-C

No more shivers... Personalized heat where you want it, when you want it!

Comfort: this bathroom Superheater features a high quality metal turbine to provide a faster and more uniform heat distribution and a very quiet operation..

Power: the combined 1000/2000 watt heating element is designed to provide instant heat in bathrooms of virtually any size.

Safety: besides meeting all applicable CSA requirements, this bathroom heater is designed to provide safe operation even after being subjected to a water spray test: all openings are located in the lower part of the unit and live electrical parts are protected by a double-wall construction.
